# **Longer Life Cylinder**

# New technology offers at least 4 times better durability

The maintenance intervals will be extended

ISO Standards (21287)

 Employs the same specifications and dimensions as the existing model, C55 ISO Cylinder series.

#### High Durability Series

High Durability Series is the series name for the "special specification" that offers superior durability and environmental resistance compared to standard products.

#### **Series Variations**

| Series                     | Action                       | Model    |    | Bore siz | ze [mm] |                 | Stroke [mm] | Mounting bracket   | Cushion   |

- \*1 Water-resistant type auto switches can be mounted on the above models, but SMC cannot guarantee water resistance.
- \*2 The 1 m lead wire is only applicable to the D-A93.

Lead wire length symbols: 0.5 m-----Nil (Example) M9NW

1 m······ M (Example) M9NWM

- 3 m----- L (Example) M9NWL
- (Example) M9NWZ 5 m..... Z
- \* Solid state auto switches marked with a "O" are produced upon receipt of order.
- \* Since there are other applicable auto switches than listed above, refer to the Web Catalog for details.
- Auto switches are shipped together with the product but do not come assembled.

#### **Mounting Bracket Part Nos.**

| Bore size [mm] | Foot<br>bracket | Flange   | Single<br>clevis |
|----------------|-----------------|----------|------------------|
| 20             | C55-L020        | C55-F020 | C55-C020         |
| 25             | C55-L025        | C55-F025 | C55-C025         |
| 32             | C55-L032        | C55-F032 | C55-C032         |
| 40             | C55-L040        | C55-F040 | C55-C040         |

- \* Foot bracket part number contains two foot brackets
- \* Mounting bolts are also included with bracket.

#### **Specifications**

<sup>\*1</sup> Stroke length tolerance does not include the amount of bumper change.

#### **Standard Strokes**

| Bore size [mm] | Standard stroke [mm]   |
|----------------|--|
| 20 to 40       | 5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 60, 80, 100, 125, 150 |

#### **Manufacturing of Intermediate Strokes**

| Description  | Dealing with the stroke in 1 mm increments by using an exclusive body with the specified stroke |
|--------------|---|
| Part no.     | Refer to "How to Order" for the standard model no. (page 1)                                     |
| Stroke range | 6 to 149 mm   |
| Evample      | Part no.: C55B32-47DCZ-XB24   |
| Example      | Makes 47 mm stroke tube   |

### **⚠** Precautions

Be sure to read this before handling the products. Refer to the back cover for safety instructions. For actuator and auto switch precautions, refer to the "Handling Precautions for SMC Products" and the "Operation Manual" on the SMC website: https://www.smcworld.com

# **∴** Caution

#### **Durability of The Cylinder**

The durability of a longer life cylinder has been evaluated by comparison with the existing cylinders under SMC's test conditions.

The durability of a cylinder depends on the customer's operating conditions and operating environment.

Therefore, durability of four times or longer will not be guaranteed under all conditions.

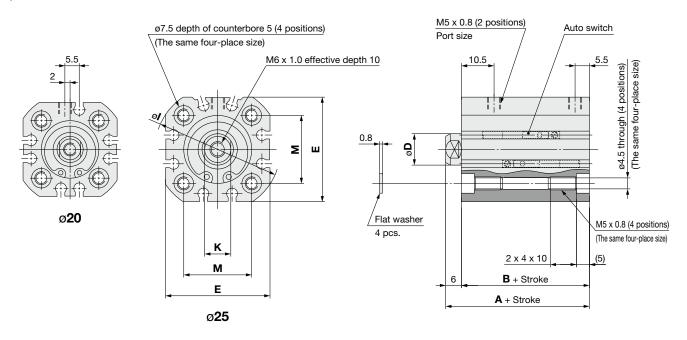

The allowable kinetic energy, allowable lateral loads at the rod end, theoretical output, weight, mounting bracket/parts numbers, and specifications with an auto switch, are equivalent to those of the ISO Cylinder C55 series. For details, refer to the **Web Catalog**.

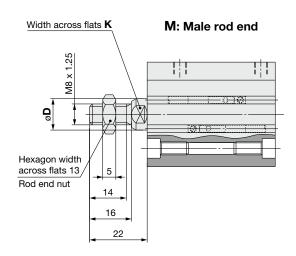

#### Dimensions (With and without auto switch are the same size)

ø**20,** ø**25** 

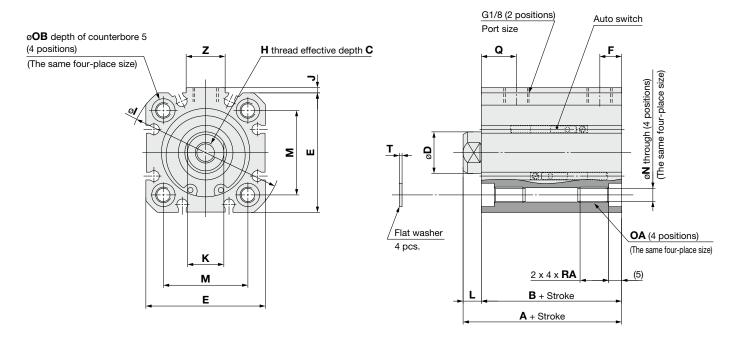

| Standard          | Type |    |    |    |    |    | [mn |

# **⚠** Safety Instructions

These safety instructions are intended to prevent hazardous situations and/or equipment damage. These instructions indicate the level of potential hazard with the labels of "Caution," "Warning" or "Danger." They are all important notes for safety and must be followed in addition to International Standards (ISO/IEC)\*1), and other safety regulations.

⚠ Danger: Danger indicates a hazard with a high level of risk which, if not avoided, will result in death or serious injury.

⚠ Warning: Warning indicates a hazard with a medium level of risk which, if not avoided, could result in death or serious injury.

⚠ Caution: Caution indicates a hazard with a low level of risk which, if not avoided, could result in minor or moderate injury.

\*1) ISO 4414: Pneumatic fluid power - General rules and safety requirements for systems and their components ISO 4413: Hydraulic fluid power - General rules and safety requirements for systems and their components IEC 60204-1: Safety of machinery - Electrical equipment of machines - Part 1: General requirements ISO 10218-1: Robots and robotic devices - Safety requirements for industrial robots - Part 1:Robots

#### **⚠Warning**

1. The compatibility of the product is the responsibility of the person who designs the equipment or decides its specifications.

Since the product specified here is used under various operating conditions, its compatibility with specific equipment must be decided by the person who designs the equipment or decides its specifications based on necessary analysis and test results. The expected performance and safety assurance of the equipment will be the responsibility of the person who has determined its compatibility with the product. This person should also continuously review all specifications of the product referring to its latest catalog information, with a view to giving due consideration to any possibility of equipment failure when configuring the equipment.

2. Only personnel with appropriate training should operate machinery and equipment.

The product specified here may become unsafe if handled incorrectly. The assembly, operation and maintenance of machines or equipment including our products must be performed by an operator who is appropriately trained and experienced.

- 3. Do not service or attempt to remove product and machinery/ equipment until safety is confirmed.
  - 1. The inspection and maintenance of machinery/equipment should only be performed after measures to prevent falling or runaway of the driven objects have been confirmed.
  - 2. When the product is to be removed, confirm that the safety measures as mentioned above are implemented and the power from any appropriate source is cut, and read and understand the specific product precautions of all relevant products carefully.
  - 3. Before machinery/equipment is restarted, take measures to prevent unexpected operation and malfunction.
- 4. Our products cannot be used beyond their specifications. Our products are not developed, designed, and manufactured to be used under the following conditions or environments. Use under such conditions or environments is not covered.
  - 1. Conditions and environments outside of the given specifications, or use outdoors or in a place exposed to direct sunlight.
  - 2. Use for nuclear power, railways, aviation, space equipment, ships, vehicles, military application, equipment affecting human life, body, and property, fuel equipment, entertainment equipment, emergency shut-off circuits, press clutches, brake circuits, safety equipment, etc., and use for applications that do not conform to standard specifications such as catalogs and operation manuals.
  - 3. Use for interlock circuits, except for use with double interlock such as installing a mechanical protection function in case of failure. Please periodically inspect the product to confirm that the product is operating properly.

#### **⚠** Caution

We develop, design, and manufacture our products to be used for automatic control equipment, and provide them for peaceful use in manufacturing industries.

Use in non-manufacturing industries is not covered.

Products we manufacture and sell cannot be used for the purpose of transactions or certification specified in the Measurement Act.

The new Measurement Act prohibits use of any unit other than SI units in

#### Limited warranty and Disclaimer/ Compliance Requirements

The product used is subject to the following "Limited warranty and Disclaimer" and "Compliance Requirements".

Read and accept them before using the product.

#### **Limited warranty and Disclaimer**

- 1. The warranty period of the product is 1 year in service or 1.5 years after the product is delivered, whichever is first.\*2) Also, the product may have specified durability, running distance or replacement parts. Please consult your nearest sales branch.
- 2. For any failure or damage reported within the warranty period which is clearly our responsibility, a replacement product or necessary parts will be provided. This limited warranty applies only to our product independently, and not to any other damage incurred due to the failure of the product.
- 3. Prior to using SMC products, please read and understand the warranty terms and disclaimers noted in the specified catalog for the particular products.
  - \*2) Vacuum pads are excluded from this 1 year warranty.

A vacuum pad is a consumable part, so it is warranted for a year after it is delivered. Also, even within the warranty period, the wear of a product due to the use of the vacuum pad or failure due to the deterioration of rubber material are not covered by the limited warranty.

#### Compliance Requirements

- 1. The use of SMC products with production equipment for the manufacture of weapons of mass destruction (WMD) or any other weapon is strictly prohibited.
- 2. The exports of SMC products or technology from one country to another are governed by the relevant security laws and regulations of the countries involved in the transaction. Prior to the shipment of a SMC product to another country, assure that all local rules governing that export are known and followed.

↑ Safety Instructions Be sure to read the "Handling Precautions for SMC Products" (M-E03-3) and "Operation Manual" before use.
