How to Use

⚠Caution

Process

1. Tool edge should be pushed straightforward into the edge of the release button along with the tube in the axial fitting direction.

   1 End of the tool — Tube

   Front / Side   ✕   Front / Side

2. After inserting, grasp the handle tightly and insert the end of the tubing to the stroke end.

   Note) Insert firmly to the guard against an accidental tube release.

3. After inserting end of tube, relax your grip on the tool. Returning force of spring releases the tube.
